We recognise the different needs and aspirations of our community and believe that a cohesive and inclusive community is central to building a happy, vibrant and successful town. We will aim to support and develop our community through: •Identifying need not being met by other services and which support a cohesive and inclusive community; •Preventative services, recognising that meeting needs before a problem arises is more effective, and usually cheaper; •Encouraging innovation in community projects, recognising that new ways of approaching a problem can lead to strong outcomes; •Partnership working, to maximise investment and the impact of funding; •Supporting sustainability of community projects, through direct funding, logistical support and advice. •Focusing on outcomes, to make sure that our support provides for real change. These principles have already been embedded in our policies in the areas of Youth, Environment, Health and Well-Being. They have also been applied in practice in other activities and funding.
